

Luis Meyehen Paz

Cloud & Data Platform Engineer

Buenos Aires, Argentina | luis.m.paz.03@gmail.com | linkedin.com/in/luisarg03 | github.com/luisarg03 | luisarg03.github.io

SUMMARY

Cloud & data platform engineer with 7+ years on AWS. I build platforms, pipelines, and tools that make data teams faster: less waiting on infrastructure, fewer incidents, more shipping. I work close to the team, automate the repetitive, and maintain what I deliver.

EXPERIENCE

Platform Engineer

Interbank · Peru · Remote · 10/2023 – Present

- Data Science teams ship without waiting on the platform team: self-service pipelines, automated SQL generation, and monitoring they can use on their own.
- Production data stays healthy: quality checks, pipeline monitoring, and drift detection — maintained by me.
- Repetitive work gets automated, including LLM-based workflows with model fallbacks, so teams keep moving when a provider changes.
- I work on AWS and maintain what I ship.

AWS Data Platform Engineer

Prisma Medios de Pago · Argentina · 08/2022 – 10/2023

- Made deployments reproducible: migrated the platform to infrastructure as code.
- Made ingestion reliable: event-driven pipelines into the company data lake, with quality checks and monitoring.

Data Platform Engineer

Tiendanube · Argentina · 10/2021 – 08/2022

- Helped build the data platform from scratch so teams query with SQL instead of asking for exports.

Data Engineer

Walmart / Dorinka · Argentina · 02/2021 – 10/2021

- Migrated databases to the cloud with data integrity during the Walmart Argentina to Dorinka transition.

Data Engineer

Tsoft · Argentina · 10/2020 – 02/2021

- Automated data ingestion and transformation from external APIs (DirectTV).

Data Engineer

Monsun · Argentina · 01/2020 – 10/2020

- Banco Supervielle: built and tested predictive models and SQL on SQL Server.
- AGIP: automated processes and ETL on SQL Server.

Data Engineer

Dthink · Argentina · 09/2019 – 01/2020

- Built databases, ETL processes, and BI dashboards that clients used.

TECHNICAL SKILLS

Cloud & IaC: AWS · Terraform · AWS CDK · CloudFormation · Lambda · Step Functions · Glue · Athena · SageMaker · S3 · EMR · ECS · ECR · DynamoDB

CI/CD & DevOps: GitHub Actions · GitLab CI · CodePipeline · CodeBuild · Bitbucket · Docker · Git · Linux

Data Engineering: ETL · SQL · PySpark · Databricks · Trino · Airflow · Pentaho · SSIS

Databases: SQL Server · Oracle · PostgreSQL · MySQL · Athena · Redshift · BigQuery

Platform Engineering: Internal Developer Platforms · Observability · Developer Enablement

AI Engineering: LangGraph · Agent Orchestration · AWS Bedrock · opencode · OpenAI APIs

Languages: Python · SQL · Bash · YAML

EDUCATION & CERTIFICATIONS

AWS Certified DevOps Engineer Professional (DOP-C02) — In progress · Target Q4 2026

Data Architect — NTT Data Academy · 2024

Computer Technician — Sec. Técnica N°3 · Buenos Aires

Languages: Spanish — Native · English — Reading: Intermediate / Writing: Basic / Speaking: Basic
